

At a glance

- Founded in 2014, it is focused on the provision of audit and tax services. For that it counts with high qualified people, led by its Partners, all of them with almost 20 years of experience in Angola.
- That experience allows to create strong relationships with the main players in Angola, namely the Angolan Authorities, understand better the always changing business environment, and advice the clients how to structure their investments in the same.
- Our purpose is not only to provide high quality services, but rather be a partner of our clients, helping it to achieve the best solutions to become players in a market that presents such challenges as the Angolan one, namely to foreign investors.
- Rather than provide advice and other accounting and audit services to our clients, our purpose is to add value to the same.
